

Endpoint Detection & Response

Identify and prevent endpoint
threats in real-time

Peace of mind with real-time Managed EDR

Product sheet
Managed EDR

Dubex Managed EDR is built on the most advanced endpoint technology, based on artificial intelligence and machine learning. The technology detects whether malware has been installed on an endpoint, uses automated mitigation, and provides both offline and online protection.

On top of Managed EDR, the Dubex Cyber Defence Center provides 24x7 Managed Detection and Response (MDR) – supplying continuously proactive monitoring of alarms initiated by our best practice use cases.

Dubex protects all of your company's branches and devices, and we guide through a structured onboarding process tailored to your organization's threat detection needs.

86%

of all attacks in a company
start at a single computer

Source: 2022 BrightCloud® Threat Report

Onboarding takes place in order of priority according to your company's most relevant endpoints. Onboarding and commissioning of the Managed EDR solution will usually be implemented within three to four weeks.

KEY SERVICE BENEFITS

Proactive AI-enhanced
detection

Real-time threat coverage
and visibility

24x7 response from
our experts
