

Security Maturity Assessment

Gain insight into your
organisation's maturity and
guidance on how to increase it

Uncover your organisations maturity and fulfil your potential

Product sheet
Security Maturity Assessment

The first step in building and maintaining a well-functioning information security organisation is to uncover the level of maturity. Dubex' Security Maturity Assessment provides your company with an overview of the organisation and implemented initiatives with-in information security.

The assessment is based on a qualitative interview with key members of your IT-staff and other relevant personnel. The collected information will be written into a report where your company will gain the following:

- Insight in the current maturity of information security compared to the level of your ambition.

40 %

of the Danish SMEs have an insufficient digital security level in relation to their risk profile.

Source: Danish Business Authority, 2021

- A brief description and list of recommendations for improvements

The project is concluded with a walkthrough meeting of the key points from the assessment.

KEY SERVICE BENEFITS

Establish an overview of current maturity

Unlock the potential of your organisation
